IN\[500\]TRODUCTION

Thank you for buying this high quality appliance from us. We would like to congratulate you on choosing this appliance, and hope you find it to be an attractive and beneficial addition to your home.

This handbook is designed to help you through each step of owning your new appliance, from installation, to use.

Please read through all of this guide carefully before you start using your appliance, as we have endeavoured to answer as many questions as possible, and provide you with as much support as we can.

If, however, you should find something missing, or not covered, please contact the Belling Customer Care team who will be only too happy to assist you on:

0871 22 22 503

In addition you could always try the website for frequently asked questions and more Customer Care information.

Our policy is one of constant development and improvement, therefore we cannot guarantee the strict accuracy of all of our illustrations and specifications - changes may have been made subsequent to publishing.

CUSTOMER CARE INFORMATION

If you should experience problems while operating the appliance please refer to Chapter 15 - Faults search. If the answer to the problem is not covered please call the Customer Care Centre number listed above.

Your appliance is covered by a 12 month manufacturers guarantee. If you experience problems within the first year from the date of purchase a service engineer will be sent to resolve the problem without charge. In order to prove the age of the product please retain your purchase receipt.

CHAPTER 1

GENERAL POINTS ON DELIVERY

On delivery, check that the following are included with the machine:

A) INSTRUCTION MANUAL

B) CAPS

C) BEND FOR OUTLET TUBE

D) LIQUID DETERGENT OR LIQUID BLEACH COMPARTMENT (CONTAINER)

KEEP THEM IN A SAFE PLACE

Check that the machine has not incurred damage during transport. If this is the case, contact your nearest Technical Assistance Centre.

CHAPTER 2

GUARANTEE

The appliance is supplied with a manufacturers 12 month guarantee. Please retain your purchase receipt. This should be kept in a safe place and presented to the engineer if a service call is required.
CHAPTER 3

SAFETY MEASURES

IMPORTANT:
FOR ALL CLEANING AND MAINTENANCE WORK

● Remove the plug
● Turn off the water inlet tap.
● All Belling appliances are earthed. Ensure that the main electricity circuit is earthed. Contact a qualified electrician if this is not the case.
● This appliance complies with Directives 89/336/EEC, 73/23/EEC and following changes.

● Do not touch the appliance with wet or damp hands or feet.

WARNING: DURING THE WASHING CYCLE, THE WATER CAN REACH A TEMPERATURE OF 90°C.

● Before opening the washing machine door, ensure that there is no water in the drum.

● Do not use extension leads or multiple plugs.
● Do not allow the appliance to be used by children or incompetent persons.
● Do not pull the mains lead or the appliance itself to remove the plug from the socket.
● Do not leave the appliance exposed to atmospheric conditions (rain, sun etc.)
● In the case of removal, never lift the appliance by the knobs or detergent drawer.

● During transportation do not lean the door against the trolley.

Important!
When the appliance location is on carpet floors, attention must be paid so as to ensure that there is no obstruction to the bottom vents.

● Lift the appliance in pairs as illustrated in the diagram.
● In the case of failure and/or incorrect operation, turn the washing machine off, close the water inlet tap and do not tamper with the appliance. Contact a Technical Assistance Centre for any repairs and ask for original spare parts. Avoidance of these norms may compromise the safety of the appliance.

● Should the supply cord (mains cable) be damaged, this is to be replaced by a specific cable available from the after sales service centre.
CHAPTER 5

SETTING UP INSTALLATION

Move the machine near its permanent position without the packaging base.

Cut tube-holding straps.

Unscrew the central screw (A); unscrew the 4 lateral screws (B) and remove the cross piece (C).

Unscrew the two rods D and remove them. Two plastic spacers will fall inside the machine.

Lean the machine forward, remove the mentioned plastic spacers and remove the plastic bags containing the two polystyrene blocks at the sides, pulling downwards.

Stop the holes using the plugs that you will find inside the bag containing the instruction booklet.

WARNING:
DO NOT LEAVE THE PACKAGING IN THE REACH OF CHILDREN AS IT IS A POTENTIAL SOURCE OF DANGER.
Fix the sheet of corrugated material on the bottom as shown in picture.

Connect the fill hose to the tap.
The appliance must be connected to the water mains using new hose-sets. The old hose-sets should not be reused.

**IMPORTANT:**
**DO NOT TURN THE TAP ON AT THIS TIME.**

Position the washing machine next to the wall. Hook the outlet tube to the edge of the sink paying attention that there are no bends or restrictions along the tube.

It is better to connect the discharge hose to a fixed outlet of a diameter greater than that of the outlet tube and at a height of min. 50 cm. If is necessary to use the plastic sleeve supplied.

Please refer to diagrams below for various installation options.

Use the 4 feet to level the machine with the floor:

- **a)** Turn the nut clockwise to release the screw adjuster of the foot.
- **b)** Rotate foot to raise or lower it until it stands firmly on the ground.
- **c)** Lock the foot in position by turning the nut anti-clockwise until it comes up against the bottom of the machine.

Ensure that the knob is on the "OFF" position and the load door is closed.

Insert the plug.

After installation, the appliance must be positioned so that the plug is accessible.
REMOVING THE PLUG:
If your appliance has a non-rewireable moulded plug and you should wish to re-route the mains cable through partitions, units etc., please ensure that either: the plug is replaced by a fused 13 ampere re-wireable plug bearing the BSI mark of approval, or; the mains cable is wired directly into a 13 amp cable outlet, controlled by a switch, (in compliance with BS 5733) which is accessible without moving the appliance.

DISPOSING OF THE PLUG:
Ensure that before disposing of the plug itself, you make the pins unusable so that it cannot be accidentally inserted into a socket.

INSTRUCTIONS FOR CONNECTING CABLE TO AN ALTERNATIVE PLUG:
Important: the wires in the mains lead are coloured in accordance with the following code:

<table>
<thead>
<tr>
<th>Color</th>
<th>Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>Green &amp; Yellow</td>
<td>Earth</td>
</tr>
<tr>
<td>Blue</td>
<td>Neutral</td>
</tr>
<tr>
<td>Brown</td>
<td>Live</td>
</tr>
</tbody>
</table>

As the colours of the wires in the lead may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:
Connect Green & Yellow wire to terminal marked E or ♦ or coloured Green or Green & Yellow. Connect Brown wire to terminal marked L or coloured Red.
Connect Blue wire to terminal marked N or coloured Black.

If a 13 amp plug (BS 1363) is used it must be fitted with a 13 amp fuse either in the plug or adaptor or at the distribution board. If you are in any doubt the electrical supply to your machine, consult a qualified electrician before use.

HOW TO CONNECT AN ALTERNATIVE PLUG:
The wires in this mains lead are coloured in accordance with the following code:

<table>
<thead>
<tr>
<th>Color</th>
<th>Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>BLUE</td>
<td>NEUTRAL(N)</td>
</tr>
<tr>
<td>BROWN</td>
<td>LIVE(L)</td>
</tr>
<tr>
<td>GREEN&amp;YELLOW</td>
<td>EARTH(E)</td>
</tr>
</tbody>
</table>

DISPOSING OF THE APPLIANCE:
When disposing of the appliance please remove the plug by cutting the mains cable as close as possible to the plug body and dispose of it as described above.
The option buttons should be selected before pressing the START button.

**BUTTON 1200/400**

In the programmes for resistant fabrics the machine gradually increases the final spin speed from 400 r.p.m. to the maximum possible speed. The button reduces spin speed to 400 r.p.m.

**SUPER RAPID BUTTON**

By pushing this button the time of the wash programme is reduced to a maximum of 50 minutes depending on the programme and the temperature selected. The super rapid button can be used for washing loads of 1 to 5 kg. (This button can be utilised only on cottons and synthetic programmes).

**EXTRA RINSE BUTTON**

The extra rinse program ensures clothing is thoroughly rinsed and free of detergents. The program combines a unique drum action with a number of additional rinses to achieve a high degree of detergent free clothing.

The extra rinse program is ideal for people with sensitive skin who require minimum detergent residue to avoid irritation or allergies. It is advisable to use this program to clean children’s clothing, towels and heavily soiled items where a lot of detergent has been used and is retained in the fibres.

Note: - This program is not suitable for woollen garments and is not available during the wool program.

**DOOR OPEN BUTTON**

IMPORTANT:
A SPECIAL SAFETY DEVICE PREVENTS THE DOOR FROM OPENING AT THE END OF THE WASH/SPIN CYCLE. AT THE END OF THE SPIN PHASE WAIT UP TO 1 MINUTE BEFORE OPENING THE DOOR.

**DOOR LOCKED INDICATOR**

The “Door Locked” indicator light is illuminated when the door is fully closed and the machine is ON. When START is pressed on the machine with the door closed the indicator will flash momentarily and then illuminate. If the door is not closed the indicator will continue to flash. A special safety device prevents the door from being opened immediately after the end of the cycle. Wait for 1 minute after the wash cycle has finished and the Door Locked light has gone out before opening the door. At the end of cycle turn the programme selector to OFF.

**START BUTTON**

When a programme is selected, wait for the “STOP” indicator light to flash before pressing the START button.

Press to start the selected cycle (according to the selected cycle one indicator lights will go on).

NOTE: WHEN THE START BUTTON HAS BEEN PRESSED THE APPLIANCE CAN TAKE A FEW SECONDS BEFORE IT STARTS WORKING.

**CHANGING THE SETTINGS AFTER THE PROGRAMMES HAS STARTED (PAUSE)**

The programme may be paused at any time during the wash cycle by holding down the “Start/Pause” button for about two seconds. When the machine is in the paused mode, the indicator light “Time countdown” and option buttons will flash. To restart the programme, press the START button once again.

If you wish to add or remove items during washing, wait 1 minute until the safety device unlocks the door. When you have carried out the manoeuvre, close the door, press START button and the appliance will continue working from where it left off.

**CANCELLING THE PROGRAMME**

To cancel the programme the programme selector should be rotated to the OFF position.
CREASE GUARD BUTTON
The Crease Guard function minimizes creases as much as possible with a uniquely designed anti-crease system that is tailored to specific fabrics.

MIXED FABRICS - the water is gradually cooled throughout the final two rinses with no spinning and then a delicate spin assures the maximum relaxation of the fabrics.

DELICATE FABRICS - final two rinses with no spinning and then the fabrics are left in water until it is time to unload. When you are ready to unload, press the “Crease Guard” button - this will drain.

WOLLENS/HAND WASH - after the final rinse the fabrics are left in water until it is time to unload and the button indicator blinking.

When you are ready to unload, press the “Crease Guard” button, this will drain and spin ready for emptying.

If you do not want to spin the clothes and activate drain only:
- Turn the programme selector to the “OFF” position;
- Select programme drain only;
- Switch on the appliance again by pressing the “Start/Pause” button.

WASH TEMPERATURE CONTROL KNOB
ROTATES IN BOTH DIRECTIONS
With this device it is possible to reduce, but not increase washing cycle temperature. The table of programmes indicate the maximum temperature advised for each type of wash.

WARNING: THIS TEMPERATURE MUST NEVER BE EXCEEDED

DRYING TIME SELECTOR KNOB
ROTATES IN BOTH DIRECTIONS
This knob sets a programme or a drying time up to a max. 120 minutes with a cool down final phase of 10 minutes.

If the drying time is selected before or during the wash cycle the machine will automatically commence the drying programme.

If a programme has been selected which does not enable the automatic drying phase (e.g. Delicate and Woolens programmes or a drain programme), at the end of the wash cycle the light STOP will go on and will not carry out the drying cycle.

NOTE: THE DRYING TIME SELECTOR KNOB MUST BE RETURN TO THE OFF POSITION (      ) AT THE END OF EACH DRYING CYCLE.

USEFUL TIPS:
The 30 minute drying programme is recommended for small loads (less than 1 kg) or slightly damp loads. Your washer-dryer ends the cycle automatically when it reaches the drying level or time selected. For the correct operation of the appliance, it is preferable not to interrupt the drying phase unless it is really necessary.

Automatic Programmes: By selecting one of these automatic programmes, the washer-dryer will calculate the time needed for drying and the residual dampness required, according to the load and drying type and the residual dampness required, according to the load and drying type selected. After pressing the START button, one of the indicators will light to display the drying time remaining.

- Extra dry drying programme (recommended for towels, bathrobes and bulky loads)
- Wardrobe dry drying programme
- Iron dry drying programme

IMPORTANT!
During the drying cycle:
Drying programme can be cancelled by rotating the drying time selector to the zero position (      ). In this case caution must be paid because the machine and clothes load may be very hot cause the cool down phase is not carry out. For a correct operation it is preferable carry out the cool down phase turning the knob in clockwise direction to the position (      ).

Drying programme cannot be changed: even if the selector is set to another programme, the machine ignores this new setting and continues to complete the original drying programme.
 PROGRAMME SELECTOR WITH OFF POSITION

ROTATES IN BOTH DIRECTIONS.
THE MACHINE IS TURNED ON BY SELECTING A
PROGRAMME VIA THE PROGRAMME SELECTOR.
THIS STATUS WILL BE INDICATED BY THE STOP
INDICATOR LIGHT FLASHING, THIS LIGHT WILL
CONTINUE TO FLASH UNTIL THE MACHINE HAS
STARTED OR THE MACHINE IS RETURNED TO THE OFF
POSITION.

Press the ‘Start/Pause’ button to start the selected cycle.

The programme carries out with the programme selector
stationary on the selected programme till cycle ends.
Switch off the washing machine by turning the selector to
OFF.

NOTE:
THE PROGRAMME SELECTOR MUST BE RETURN TO THE
OFF POSITION AT THE END OF EACH CYCLE OR WHEN
STARTING A SUBSEQUENT WASH CYCLE PRIOR TO THE
NEXT PROGRAMME BEING SELECTED AND STARTED.

TIME COUNTER SYSTEM INDICATOR LIGHTS
In order to better manage your time, this washing machine
features an indicator light system that keeps you constantly
informed on the remaining cycle time.

Indicator light START:
Remaining time above 60 minutes

Indicator light 60:
Remaining time less than 60 minutes

Indicator light 30:
Remaining time less than 30 minutes

Indicator light 15:
Remaining time less than 15 minutes

Indicator light Stop:
End of the programme.

BUTTONS INDICATOR LIGHT
The indicator light around the option buttons will light when
specific options are selected.

“DRYING” INDICATOR LIGHT
Pilot light comes on to indicate that washer/dryer is drying.
Please read these notes

When washing heavily soiled laundry it is recommended the load is reduced to 3 kg maximum.

** Programme also recommended for low temperature wash (below the indicated Max. temperature). Programmes according to CENELEC EN 60456.

The variable temperature selector allows a reduction in the wash temperature in each programme.

**ATTENTION:** With the temperature selector on the ° symbol position the programme will be performed with a cold wash.

* Special programmes for automatic drying.

When only a limited number of articles have stains which require treatment with liquid bleaching agents, preliminary removal of stain can be carried out in the washing machine. Pour the bleach into the liquid bleach container, inserted into the compartment marked "II" in the detergent drawer, and set the special programme "RINSE".

When this phase has terminated, turn the programme selector to the "OFF" position, add the rest of the fabrics and proceed with a normal wash on the most suitable programme.
CHAPTER 8

SELECTION

For the various types of fabrics and various degrees of dirt the washing machine has 4 different programme bands according to: wash cycle, temperature and length of cycle (see table of washing cycle programmes).

1 RESISTANT FABRICS
The programmes have been designed for a maximum wash and the rinses, with spin intervals, ensure perfect rinsing. The final spin gives more efficient removal of water.

2 MIXED AND SYNTHETIC FABRICS
The main wash and the rinse gives best results thanks to the rotation rhythms of the drum and to the water levels. A gentle spin will mean that the fabrics become less creased.

3 SPECIAL DELICATE FIBRES
This is a new wash cycle which alternates washing and soaking and is particularly recommended for very delicate fabrics such as Pure Machine Washable Wool. The wash cycle and rinses are carried out with high water levels to ensure best results.

SPECIAL “HAND WASH”
This washing machine also has a gentle Hand Wash programme cycle. This programme allows a complete washing cycle for garments specified as “Hand Wash only” on the fabric care label. The programme has a temperature of 30°C and concludes with 3 rinses and a slow spin.

SPECIAL “COTTON RINSES” PROGRAMME
This programme carries out 3 rinses with a maximum spin. It can be used for rinsing any type of fabric, e.g. use after hand-washing.

This program can be also used as cycle of Bleaching (see table of washing cycle programmes).

SPECIAL “MIXED RINSES” PROGRAMME
This programme carries out three rinses with an intermediate spin.

SPECIAL “FAST SPIN” PROGRAMME
Programme “FAST SPIN” carries out a maximum spin.

DRAIN ONLY
This programme drains out the water.

COTTON DRYING
Cotton, terry towelling, linen, hemp fabrics, etc...

SYNTHETICS DRYING
Mixed fabrics (synthetics/cotton), synthetic fabrics.

“ALL 40°C” PROGRAMME
This is an exclusive system and involves 2 great advantages for the consumer:

• to be able to wash together different type of fabrics (e.g. cotton + synthetic etc...;

• to wash with a considerable energy saving.

The “All 40°C” is an eco friendly programme that has low energy consumption (850W/h). The programme achieves this by using a low water temperature combined with periods of inactive soaking and short periods of drum cycling over a period of three hours.

Important:
• the first washing of new coloureds fabrics must be done separately;

• in every case, never mix NON-FAST COLOURED FABRICS.

30 MINUTE RAPID PROGRAMME
The 30 minute rapid programme allows a complete washing cycle to be carried out in approximately 30 minutes, with up to a maximum load of 2 kg and a temperature of 40°C. When selecting the “30 minute rapid” programme, please note that we recommend you use only 20% of the recommended quantities shown on the detergent pack.
CHAPTER 10
THE PRODUCT

IMPORTANT:
When washing heavy rugs, bedspreads and other heavy articles, it is advisable not to spin.
Do not dry wool items with special padding, delicate silk items, rubber, plastic, including some types of plastic poppers on duvet covers and foam plastic items are not suitable for tumble drying.
To be machine-washed, woollen garments and other articles in wool must bear the “Machine Washable Label”.

IMPORTANT:
When sorting articles ensure that:
- there are no metal objects in the washing (e.g. brooches, safety pins, pins, coins etc.).
- cushion covers are buttoned, zips and hooks are closed, loose belts and long tapes on dressing gowns are knotted.
- runners from curtains are removed.
- attention is paid to garment labels.
- when sorting, any tough stains should be removed prior to washing using stain removers only recommended on label.

NOTE: SOME DETERGENTS ARE DIFFICULT TO REMOVE. FOR THESE, WE RECOMMEND YOU USE THE SPECIAL DISPENSER WHICH IS PLACED IN THE DRUM.

NOTE: ONLY PUT LIQUID PRODUCTS IN THE COMPARTMENT LABELLED “✿✿”. THE MACHINE IS PROGRAMMED TO AUTOMATICALLY TAKE UP ADDITIVES DURING THE FINAL RINSE STAGE FOR ALL WASH CYCLES.
CHAPTER 11

CUSTOMER AWARENESS

A guide environmentally friendly and economic use of your appliance.

MAXIMISE THE LOAD SIZE
Achieve the best use of energy, water, detergent and time by using the recommended maximum load size. Save up to 50% energy by washing a full load instead of 2 half loads.

DO YOU NEED TO PRE-WASH?
For heavily soiled laundry only! Save detergent, time, water and between 5 to 15% energy consumption by NOT selecting Prewash for slight to normally soiled laundry.

IS A HOT WASH REQUIRED?
Pretreat stains with stain remover or soak dried in stains in water before washing to reduce the necessity of a hot wash programme. Save up to 50% energy by using a 60°C wash programme.

BEFORE USING A DRYING PROGRAMME...
SAVE energy and time by selecting a high spin speed to reduce the water content in laundry before using a drying programme.

WASHING

VARIABLE CAPACITY

This washing machine automatically adapts the level of the water to the type and quantity of washing. In this way it is also possible to obtain a “personalized” wash from an energy saving point of view. This system gives a decrease in energy consumption and a sensible reduction in washing times.

EXAMPLE:
A net bag should be used for particularly delicate fabrics.

Let us suppose that the washing consists of HEAVILY SOILED COTTON (tough stains should be removed with suitable stain removal).

It is advisable not to wash a load made up entirely of articles in towelling fabric which absorb a lot of water and become too heavy.

- Open the detergent drawer (P).
- Put 120 g in the main wash compartment marked II.
- Put 50 ml of the desired additive in the additives compartment.
- Close the detergent drawer (P).
Ensure that the water inlet tap is turned on.

And that the discharge tube is in place.

Make sure the drying control knob (I) is on “  ”, or else the programme will carry on till drying is completed.

PROGRAMME SELECTION

Refer to the programme guide to select the most suitable programme. Turning the selector knob required programme is activate. Wait for the “STOP” indicator light to flash. Then press the START button. When the START button is pressed the machine sets the working sequence in motion.

The programme carries out with the programme selector stationary on the selected programme till cycle ends.

Warning: If there is any break in the power supply while the machine is operating, a special memory stores the selected programme and, when the power is restored, it continues where it left off.

At the end of the programme the indicator light “end cycle” will go on.

When the programme has finished, wait for the door lock to be released (about 1 minute after the programme has finished). Switch off the machine by turning the programme selector to the “OFF” position. Open the door and remove the laundry.

FOR ALL TYPES OF WASH CONSULT THE PROGRAMME TABLE AND FOLLOW THE OPERATIONS IN THE ORDER INDICATED.

CHAPTER 12

DRYING

DON'T DRY GARMENTS MADE FROM FOAM RUBBER OR FLAMMABLE MATERIALS.

IMPORTANT:
THIS DRYER CAN ONLY BE USED FOR LAUNDRY WHICH HAS BEEN WASHED AND SPIN DRIED.

WARNING:
Indications given are general, therefore some practice is needed for the best drying results. We recommend setting a lower drying time than indicated, when first using, so as to establish the degree of dryness required. We recommend not to dry fabrics that fray easily, such as rugs or garments with a deep pile, to avoid air duct clogging. The water is then conveyed to the drain circuit, which is sealed and therefore, no steam can be released outside.
THEREFORE, YOU MAY DRY COTTON, TERRY TOWELLING, LINEN, HEMP FABRICS, ETC. AS FOLLOWS:

The correct way to dry:

● Open door.

● Fill with up to 2,5 kg - in case of large items (e.g. sheets) or very absorbent items (e.g. towels or jeans), it is a good idea to reduce the load.

● Close door.

● Turn programme dial to cotton ☀ ☀ .

● If you would like your fabrics wardrobe dry, turn the "drying programme selection" knob until the position .

● If you would like your fabrics iron dry, turn the "drying programme selection" knob, until the position .

● If you wish to select a timed drying cycle, turn the "drying programme selection" until the timed position 120 or 60 or 30.

DOUBLE-SKIN DOOR
The appliance door is fitted with a protective shield to prevent contact being made with the glass which reaches high temperatures, particularly during the drying cycle.

WARNING: DO NOT TOUCH DOOR FOR ANY REASON WHATSOEVER.

● Make sure water tap is open.

● Make sure water drain is correctly positioned.

IMPORTANT
NEVER OPEN THE DOOR AFTER THE DRYING CYCLE HAS BEGUN - WAIT UNTIL THE COOL DOWN PERIOD PROVIDED FOR BY THE CYCLE.

Only dry pre-spun laundry

The washer/dryer can perform two types of drying:

Cotton, terry towelling, linen, hemp fabrics, etc...

Mixed fabrics (synthetics/cotton), synthetic fabrics.
WARNING:
DO NOT DRY WOOLLEN GARMENTS OR ARTICLES WITH SPECIAL PADDING, (E.G. QUILTS, QUILTED ANORAKS, ETC.). DELICATE FABRICS IF GARMENTS ARE DRIP/DRY, LOAD LESS ITEMS AO AS TO PREVENT CREASING.

### TABLE OF DRYING TIMES (IN MINUTES):

<table>
<thead>
<tr>
<th>PROGRAMME</th>
<th>COTTON</th>
<th>MIXED</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Min 1 Kg</td>
<td>Max 2.5 Kg</td>
</tr>
<tr>
<td>Extra</td>
<td>from 30’</td>
<td>to 150’</td>
</tr>
<tr>
<td>Wardrobe</td>
<td>from 30’</td>
<td>to 120’</td>
</tr>
<tr>
<td>Iron</td>
<td>from 30’</td>
<td>to 100’</td>
</tr>
</tbody>
</table>

- Press the START button.
- The timed indicators will display the drying time remaining, until the STOP indicator lights up.
- The drying phase will begin with the programme dial fixed on the symbol until the end of drying.
- At the end of the programme the indicator light “Stop” will go on.
- Wait for the door lock to be released (about 1 minute after the programme has finished). The “Door Security” indicator light will go out.
- Turn the “drying programme selection” on the position.
- Switch off the machine by turning the programme selector on the “OFF” position.
- Open the door and remove the laundry.
If you would like your fabrics iron dry, turn the “drying programme selection” knob, until the position .

If you wish to select a timed drying cycle, turn the “drying programme selection” until the timed position 120 or 60 or 30.

Press the “Start/Pause” button.

The programme carries out with the programme selector stationary on the selected programme till cycle ends.

The washer-dryer will then complete the entire drying programme.

At the end of the programme the indicator light “Stop” will go on.

Wait for the door lock to be released (about 1 minute after the programme has finished). The “Door Security” indicator light will go out.

Turn the “drying programme selection” on the position.

Switch off the machine by turning the programme selector on the “OFF” position.

Open the door and remove the laundry.
Do not use abrasives, spirits and/or diluents on the exterior of the appliance. It is sufficient to use a damp cloth.

The washing machine requires very little maintenance:

- Cleaning of drawer compartments.

- Removals or long periods when the machine is left standing.

**CLEANING OF DRAWER COMPARTMENTS**

Although not strictly necessary, it is advisable to clean the detergent, bleach and additives compartments occasionally.

Remove the compartments by pulling gently.

Clean with water.

Put the compartments back into place.

**REMOVALS OR LONG PERIODS WHEN THE MACHINE IS LEFT STANDING**

When the machine is left standing for long periods in unheated rooms, the drain hose should be emptied of all remaining water.

This operation is recommended when moving the appliance from its installation.

The appliance must be switched off and unplugged. A bowl is needed. Detach the drainage hose from the clamp and lower it over the bowl until all the water is removed.

Repeat the same operation with the water inlet hose.

If the fault should persist, contact a Technical Assistance Centre. For prompt servicing, give the model of the washing machine, to be found on the label placed on the cabinet inside of the porthole.

**Important**

1. The use of environment friendly detergents without phosphates may produce the following effects:
   - The discharge rinse water may result cloudier due to the presence of zeolites in suspension. This does not compromise the efficiency of the rinses.
   - The presence of white powder (zeolites) on the washing at the end of the washing cycle. This does not remain incorporated in the fabric and does not alter the colour.
   - The presence of foam in the last rinse water which is not necessarily a sign of inadequate rinsing.
   - The non-ionic surface-active agents present in the composition of washing machine detergents are often difficult to remove from the washing itself and, even in small quantities, may produce visible signs of the formation of foam.
   - Carrying out further rinses, in cases such as this, is not useful.

2. If your washing machine fails to function, carry out the above-mentioned checks before calling the Technical Assistance Service.
