Users Guide & Installation Handbook

WD14v

Please read carefully and retain for future reference

www.belling.co.uk
INTRODUCTION

Thank you for buying this high quality appliance from us. We would like to congratulate you on choosing this appliance, and hope you find it to be an attractive and beneficial addition to your home.

This handbook is designed to help you through each step of owning your new appliance, from installation, to use.

Please read through all of this guide carefully before you start using your appliance, as we have endeavoured to answer as many questions as possible, and provide you with as much support as we can.

If, however, you should find something missing, or not covered, please contact the Belling Customer Care team who will be only too happy to assist you on:

0871 22 22 503

In addition you could always try the website for frequently asked questions and more Customer Care information.

Our policy is one of constant development and improvement, therefore we cannot guarantee the strict accuracy of all of our illustrations and specifications - changes may have been made subsequent to publishing.

CUSTOMER CARE INFORMATION

If you should experience problems while operating the appliance please refer to Chapter 15 – Faults search. If the answer to the problem is not covered please call the Customer Care Centre number listed above.

Your appliance is covered by a 12 month manufacturers guarantee. If you experience problems within the first year from the date of purchase a service engineer will be sent to resolve the problem without charge. In order to prove the age of the product please retain your purchase receipt.

CHAPTER 1

GENERAL POINTS ON DELIVERY

On delivery, check that the following are included with the machine:

A) INSTRUCTION MANUAL

B) PLUGS

C) BEND FOR OUTLET TUBE

D) LIQUID DETERGENT OR LIQUID BLEACH COMPARTMENT (CONTAINER)

KEEP THEM IN A SAFE PLACE

Check that the machine has not incurred damage during transport. If this is the case, contact your nearest Technical Assistance Centre.

CHAPTER 2

GUARANTEE

The appliance is supplied with a manufacturer's 12 month guarantee. Please retain your purchase receipt. This should be kept in a safe place and presented to the engineer if a service call is required.
CHAPTER 3

SAFETY MEASURES

IMPORTANT:
FOR ALL CLEANING AND MAINTENANCE WORK

- Remove the plug
- Turn off the water inlet tap.
- All Belling appliances are earthed. Ensure that the main electricity circuit is earthed. Contact a qualified electrician if this is not the case.

- Do not touch the appliance with wet or damp hands or feet.

WARNING: DURING THE WASHING CYCLE, THE WATER CAN REACH A TEMPERATURE OF 90°C.

- Before opening the washing machine door ensure that there is no water in the drum.

- Do not use extension leads or multiple plugs.

- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

- Do not pull the mains lead or the appliance itself to remove the plug from the socket.

- Do not leave the appliance exposed to atmospheric conditions (rain, sun etc.)

- In the case of removal, never lift the appliance by the knobs or detergent drawer.

- During transportation, do not lean the door against the trolley.

Important!
When the appliance location is on carpet floors, attention must be paid so as to ensure that there is no obstruction to the bottom vents.

- Lift the appliance in pairs as illustrated in the diagram.

- In the case of failure and/or incorrect operation, turn the washing machine off, close the water inlet tap and do not tamper with the appliance. Contact a Technical Assistance Centre for any repairs and ask for original spare parts. Avoidance of these norms may compromise the safety of the appliance.

- Should the supply cord (mains cable) be damaged, this is to be replaced by a specific cable available from the after sales service centre.
CHAPTER 5

SETTING UP INSTALLATION

Move the machine near its permanent position without the packaging base.

Cut tube-holding straps.

Remove the 3 fixing screws marked (A) and remove the 3 spacers marked (B). A spacer will fall inside the machine.

Remove the screw (C).

By tilting the machine, remove the above mentioned spacer.

Stop the holes using the plugs that you will find inside the bag containing the instruction booklet.

WARNING:
DO NOT LEAVE THE PACKAGING IN THE REACH OF CHILDREN AS IT IS A POTENTIAL SOURCE OF DANGER.

---

</table>
Use the 4 feet to level the machine with the floor:

a) Turn the nut clockwise to release the screw adjuster of the foot.

b) Rotate foot to raise or lower it until it stands firmly on the ground.

c) Lock the foot in position by turning the nut anti-clockwise until it comes up against the bottom of the machine.

Ensure that the knob is on the “OFF” position and the load door is closed

Insert the plug.

After installation, the appliance must be positioned so that the plug is accessible.
**REMOVING THE PLUG:**

If your appliance has a non-rewireable moulded plug and you should wish to re-route the mains cable through partitions, units etc., please ensure that either:

- the plug is replaced by a fused 13 ampere re-wireable plug bearing the BSI mark of approval.
- or:
  - the mains cable is wired directly into a 13 amp cable outlet, controlled by a switch, (in compliance with BS 5733) which is accessible without moving the appliance.

**DISPOSING OF THE PLUG:**

Ensure that before disposing of the plug itself, you make the pins unusable so that it cannot be accidentally inserted into a socket.

**INSTRUCTIONS FOR CONNECTING CABLE TO AN ALTERNATIVE PLUG:**

**Important:** the wires in the mains lead are coloured in accordance with the following code:

- Green & Yellow: Earth
- Blue: Neutral
- Brown: Live

As the colours of the wires in the lead may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

Connect Green & Yellow wire to terminal marked E or ☑ or coloured Green or Green & Yellow.
Connect Brown wire to terminal marked L or coloured Red.
Connect Blue wire to terminal marked N or coloured Black.

If a 13 amp plug (BS 1363) is used it must be fitted with a 13 amp fuse either in the plug or adaptor or at the distribution board. If you are in any doubt the electrical supply to your machine, consult a qualified electrician before use.

**HOW TO CONNECT AN ALTERNATIVE PLUG:**

The wires in this mains lead are coloured in accordance with the following code:

- BLUE Neutral (N)
- BROWN Live (L)
- GREEN & YELLOW Earth (E)

**DISPOSING OF THE APPLIANCE:**

When disposing of the appliance please remove the plug by cutting the mains cable as close as possible to the plug body and dispose of it as described above.

---

**CONTROLS**

- Door open button
- Programme selector with “OFF” position
- "Door Security" indicator light
- "Delay Start" button
- "Time countdown system" and “Delay Start” indicator lights
- "Spin Selection" button
- Spin speed indicator light
- "Super Rapid" button
- "Extra Rinse" button
- "Drying Selection" button
- Drying programme indicators
- "Cold Wash” button
- “Crease Guard” button
- "Start/Pause” button
- Buttons indicator light
- Detergent drawer
**DESCRIPTION OF CONTROL**

**DOOR OPEN BUTTON**

**IMPORTANT:**
A SPECIAL SAFETY DEVICE PREVENTS THE DOOR FROM OPENING AT THE END OF THE WASH/SPIN CYCLE. AT THE END OF THE SPIN PHASE WAIT UP TO 1 MINUTE BEFORE OPENING THE DOOR.

**PROGRAMME SELECTOR WITH OFF POSITION**

ROTATES IN BOTH DIRECTIONS.
THE MACHINE IS TURNED ON BY SELECTING A PROGRAMME VIA THE PROGRAMME SELECTOR. THIS STATUS WILL BE INDICATED BY THE STOP INDICATOR LIGHT FLASHING; THIS LIGHT WILL CONTINUE TO FLASH UNTIL THE MACHINE HAS STARTED OR THE MACHINE IS RETURNED TO THE OFF POSITION.

Press the “Start/Pause” button to start the selected cycle.
The programme carries out with the programme selector stationary on the selected programme till cycle ends.
Switch off the washing machine by turning the selector to OFF.

**NOTE:**
THE PROGRAMME SELECTOR MUST BE RETURN TO THE OFF POSITION AT THE END OF EACH CYCLE OR WHEN STARTING A SUBSEQUENT WASH CYCLE PRIOR TO THE NEXT PROGRAMME BEING SELECTED AND STARTED.

**DOOR LOCKED INDICATOR**
The “Door Locked” indicator light is illuminated when the door is fully closed and the machine is ON.
When START is pressed on the machine with the door closed the indicator will flash momentarily and then illuminate.
If the door is not closed the indicator will continue to flash.
A special safety device prevents the door from being opened immediately after the end of the cycle. Wait for 1 minute after the wash cycle has finished and the Door Locked light has gone out before opening the door. At the end of cycle turn the programme selector to OFF.

---

**DELAY START BUTTON**

Appliance start time can be set with this button, delaying the start by 3, 6 or 9 hours.
Proceed as follows to set a delayed start:

Select a programme (”STOP” indicator light blinks)
Press “Delay Start” button (each time the button is pressed the start will be delayed by 3, 6 or 9 hours respectively and the corresponding light will blink).
Press “Start/Pause” to commence the Delay Start operation (the indicator light associated with the selected Delay Start time stops blinking and remains ON).
At the end of the required time delay the programme will start.
To cancel the Delay Start function:
press the “Delay Start” button until the indicator lights will be off (The “STOP” light blinks) and the programme can be started manually using the “Start/Pause” button or switch off the appliance by turning the programme selector to “OFF” position.

**WARNING:** IF THERE IS ANY BREAK IN THE POWER SUPPLY WHILE THE MACHINE IS OPERATING, A SPECIAL MEMORY STORES THE SELECTED PROGRAMME AND, WHEN THE POWER IS RESTORED, IT CONTINUES WHERE IT LEFT OFF.

**TIME COUNTDOWN SYSTEM INDICATOR LIGHTS**

In order to better manage your time, this washing machine features an indicator light system that keeps you constantly informed on the remaining cycle time.

<table>

</tr>
<tr>
<td>15</td>
<td>Remaining time less than 15 minutes</td>
</tr>
</tbody>
</table>

**Indicator light Stop:**
End of the programme.
DRYING SELECTION BUTTON
With the programme selector not in the OFF position, press the button to select the required drying programme; an indicator will light to display the drying result selected each time you press the button. To cancel the selection before the start of a drying programme, press the button repeatedly until the indicators go out or return the programme selector to the OFF position. To cancel the cycle during the drying phase, hold the button down for 2 seconds until the cooling indicator lights up; given the high temperature inside the drum, we recommend that you allow the dryer to complete the cool down period before returning the programme selector to the OFF position and removing the laundry.

DRYING PROGRAMME INDICATORS
The indicators display the type of programme and/or drying time:
Automatic Programmes: By selecting one of these automatic programmes, the washer-dryer will calculate the time needed for drying and the residual dampness required, according to the load and drying type selected. After pressing the START button, one of the indicators will light to display the drying time remaining.
- Extra dry drying programme (recommended for towels, bathrobes and bulky loads)
- Cupboard dry drying programme
- Iron dry drying programme

USEFUL TIPS:
The 30 minute drying programme is recommended for small loads (less than 1 kg) or slightly damp loads. Your washer-dryer ends the cycle automatically when it reaches the drying level selected. For the correct operation of the appliance, it is preferable not to interrupt the drying phase unless it is really necessary.

Timed Programmes: 120 minutes – 90 minutes – 60 minutes – 30 minutes: Dual function indicators: If one of the 3 automatic drying programmes is selected, the indicators display the drying time remaining. They may be used to select timed drying programmes.

Useful Tips:

COLD WASH BUTTON
By pressing this button it is possible to transform every programme into a cold washing one, without modifying other characteristics (water level, times, rythmes, etc...). Curtains, small carpets, man made delicate fabrics, non coulor fast garments can be safely washed thanks to this new device.
CREASE GUARD BUTTON
The Crease Guard function minimizes creases as much as possible with a uniquely designed anti-crease system that is tailored to specific fabrics.

MIXED FABRICS - the water is gradually cooled throughout the final two rinses with no spinning and then a delicate spin assures the maximum relaxation of the fabrics.

DELICATE FABRICS – final two rinses with no spinning and then the fabrics are left in water until it is time to unload. When you are ready to unload, press the "Crease Guard" button – this will drain.

WOLLENS/HAND WASH – after the final rinse the fabrics are left in water until it is time to unload and the button indicator blinking.
When you are ready to unload, press the "Crease Guard" button, this will drain and spin ready for emptying.
If you do not want to spin the clothes and activate drain only:
- Turn the programme selector to the "OFF" position;
- Select programme drain only;
- Switch on the appliance again by pressing the "Start/Pause" button.

START BUTTON
When a programme is selected, wait for the "STOP" indicator light to flash before pressing the START button.
Press to start the selected cycle (according to the selected cycle one indicator lights will go on).

NOTE: WHEN THE START BUTTON HAS BEEN PRESSED THE APPLIANCE CAN TAKE A FEW SECONDS BEFORE IT STARTS WORKING.

CHANGING THE SETTINGS AFTER THE PROGRAMMES HAS STARTED (PAUSE)
The programme may be paused at any time during the wash cycle by holding down the "Start/Pause" button for about two seconds. When the machine is in the paused mode, the indicator light "Time countdown", Spin Speed and option buttons will flash. To restart the programme, press the START button once again.
If you wish to add or remove items during washing, wait 1 minute until the safety device unlocks the door. When you have carried out the manoeuvre, close the door, press START button and the appliance will continue working from where it left off.

CANCELLING THE PROGRAMME
To cancel the programme, set the selector to the OFF position. Select a different programme.
Re-set the programme selector to the OFF position.

BUTTON INDICATOR LIGHT
These light up when the relevant buttons are pressed.
If an option is selected that is not compatible with the selected programme then the light on the button first flashes and then goes off.

**Please read these notes**

When washing heavily soiled laundry it is recommended the load is reduced to 4 kg maximum.

**Information for the test laboratories**
(Ref. EN 50229 Standards)

**Washing**
Use the programme **

**Drying**
First drying with 4kg (the load consist: pillowcases and hand-towels) selecting the cotton drying programme (cupboard dry (L)).
Second drying with 2kg (the load consist: 2 sheets and hand towels) selecting the cotton drying programme (cupboard dry (L)) 90 minutes (90').

The spin speed may also be reduced, to match any guidelines suggested on the fabric label, or for very delicate fabrics cancel the spin completely this option is available with a spin speed button.

* Programmes for automatic drying.
CHAPTER 8

SELECTION

For the various types of fabrics and various degrees of dirt the washing machine has different programme bands according to: wash cycle, temperature and length of cycle (see table of washing cycle programmes).

RESISTANTS FABRICS

The Cotton programme is designed for maximum washing and rinsing efficiency. With spin cycles in between, the programme guarantees the laundry is rinsed perfectly. The final spin cycle ensures laundry is spun dry as much as possible up to the maximum speed.

The Cotton programme includes a Prewash cycle. This option is particularly useful for really dirty loads and can be used independently of the main wash programme. Additional detergent for the Prewash part of the programme should be added to the first compartment of the soap drawer labeled “I” (please refer to the section of this manual entitled “Detergent”). We recommend you use only 20% of the quantity used for the main wash programme.

MIXED AND SYNTHETIC FABRICS

The main wash and the rinse gives best results thanks to the rotation rhythms of the drum and to the water levels.

A gentle spin will mean that the fabrics become less creased.

SPECIAL “RINSE” PROGRAMME

This programme carries out three rinses with an intermediate spin (which can be reduced or excluded by using the correct button). It can be used for rinsing any type of fabric, eg, use after hand-washing.

SPECIAL “SPIN” PROGRAMME

Programme “SPIN” carries out a maximum spin (which can be reduced by using the correct button).

DRAIN ONLY

This programme drains out the water.

SPECIAL DELICATE FIBRES

This is a new wash cycle which alternates washing and soaking and is particularly recommended for very delicate fabrics such as Pure Machine Washable Wool. The wash cycle and rinses are carried out with high water levels to ensure best results.

WOOLMARK PROGRAMME

The special cycle, certified by WOOLMARK, enables to thoroughly wash garments without damaging them. The cycle comprises of alternate periods of activity and pauses. The programme has a maximum temperature of 30° and concludes with 3 rinses and a short spin.

SPECIAL “HAND WASH”

This washing machine also has a gentle Hand Wash programme cycle. This programme allows a complete washing cycle for garments specified as “Hand Wash only” on the fabric care label. The programme has a temperature of 30°C and concludes with 3 rinses and a slow spin.

30 MINUTE RAPID PROGRAMME

The 30 minute rapid programme allows a complete washing cycle to be carried out in approximately 30 minutes, with up to a maximum load of 2 kg and a temperature of 40°C.

When selecting the “30 minute rapid” programme, please note that we recommend you use only 20% of the recommended quantities shown on the detergent pack.

“A” WASH 59'

This specially designed programme maintains the high quality wash performance identified with the “A” rating whilst greatly reducing the wash time. The programme is designed for a maximum load of 3 kg with a temperature of 60°C and concludes with 2 rinses and a high speed spin sequence.

AA SPECIAL PROGRAMME at 40°C

This special programme has been studied to allow you to obtain the best washing performance, even at full load, as the 60°C Cotton programme (the normative cycle), but with the advantage of an energy saving due to 40°C temperature, instead of 60°C.

The length of this programme lasts almost the 3 hours.

“ALL 40°C” PROGRAMME

This is an exclusive system and involves 2 great advantages for the consumer:

• to be able to wash together different type of fabrics (e.g. cotton + synthetic etc…) FAST COLOURED;

• to wash with a considerable energy saving.

The “All 40°C” is an eco friendly programme that has low energy consumption (850W/h). The programme achieves this by using a low water temperature combined with periods of inactive soaking and short periods of drum cycling over a period of three hours.

Important:

• the first washing of new coloureds fabrics must be done separately;

• in every case, never mix NON-FAST COLOURED fabrics.

Drying

Note: Dispensers used for concentrated powders and liquid detergents must be removed from the drum before commencing the tumble drying programmes.

The drum changes direction during the drying cycle to prevent the laundry from tangling and hence produce even drying. Cool air is used during the last ten minutes of the drying cycle to minimise creasing.

High Heat

High temperature drying programme for Cottons and linen items, always refer to the care label

Low Heat

Low temperature drying programme for synthetics and mixed fibres, always refer to the care label.
CHAPTER 10

THE PRODUCT

IMPORTANT:
When washing heavy rugs, bed spreads and other heavy articles, it is advisable not to spin.
Do not dry wool, items with special padding, delicate silk items, rubber, plastic, including some types of plastic poppers on duvet covers and foam plastic items are not suitable for tumble drying.
To be machine-washed, woollen garments and other articles in wool must bear the "Machine Washable Label".

IMPORTANT:
When sorting articles ensure that:
- there are no metal objects in the washing (e.g. brooches, safety pins, pins, coins etc.),
- cushion covers are buttoned, zips and hooks are closed, loose belts and long tapes on dressing gowns are knotted,
- runners from curtains are removed,
- attention is paid to garment labels,
- when sorting, any tough stains should be removed prior to washing using stain removers only recommended on label.

NOTE: SOME DETERGENTS ARE DIFFICULT TO REMOVE. FOR THESE, WE RECOMMEND YOU USE THE SPECIAL DISPENSER WHICH IS PLACED IN THE DRUM.

NOTE: ONLY PUT LIQUID PRODUCTS IN THE COMPARTMENT LABELLED "✿". THE MACHINE IS PROGRAMMED TO AUTOMATICALLY TAKE UP ADDITIVES DURING THE FINAL RINSE STAGE FOR ALL WASH CYCLES.

CHAPTER 9

DETERGENT DRAWER

The detergent drawer is split into 3 compartments:

- the compartment labelled "I" is for prewash detergent;
- the compartment labelled "II" is for special additives, fabric softeners, fragrances, starch, brighteners etc;
- the compartment labelled "III" is for main wash detergent.

If liquid detergents are used, please insert the special container supplied into the compartment marked "II" in the detergent drawer. This ensures that the liquid detergent enters the drum at the right stage of the wash cycle.

This special container must be inserted when using the "RINSE" program as a BLEACHING cycle.

NOTE: SOME DETERGENTS ARE DIFFICULT TO REMOVE. FOR THESE, WE RECOMMEND YOU USE THE SPECIAL DISPENSER WHICH IS PLACED IN THE DRUM.

NOTE: ONLY PUT LIQUID PRODUCTS IN THE COMPARTMENT LABELLED "✿". THE MACHINE IS PROGRAMMED TO AUTOMATICALLY TAKE UP ADDITIVES DURING THE FINAL RINSE STAGE FOR ALL WASH CYCLES.
CHAPTER 11

CUSTOMER AWARENESS

A guide environmentally friendly and economic use of your appliance.

MAXIMISE THE LOAD SIZE
Achieve the best use of energy, water, detergent and time by using the recommended maximum load size.
Save up to 50% energy by washing a full load instead of 2 half loads.

DO YOU NEED TO PRE-WASH?
For heavily soiled laundry only!
SAVE detergent, time, water and between 5 to 15% energy consumption by NOT selecting Prewash for slight to normally soiled laundry.

IS A HOT WASH REQUIRED?
Pretreat stains with stain remover or soak dried in stains in water before washing to reduce the necessity of a hot wash programme.
Save up to 50% energy by using a 60°C wash programme.

BEFORE USING A DRYING PROGRAMME...
SAVE energy and time by selecting a high spin speed to reduce the water content in laundry before using a drying programme.

WASHING

VARIABLE CAPACITY

This washing machine automatically adapts the level of the water to the type and quantity of washing. In this way it is also possible to obtain a “personalized” wash from an energy saving point of view. This system gives a decrease in energy consumption and a sensible reduction in washing times.

EXAMPLE:
A net bag should be used for particularly delicate fabrics.

Let us suppose that the washing consists of HEAVILY SOILED COTTON (tough stains should be removed with suitable stain removal).

It is advisable not to wash a load made up entirely of articles in towelling fabric which absorb a lot of water and become too heavy.

● Open the detergent drawer.
● Put 120 g in the main wash compartment marked II.
● Put 50 ml of the desired additive in the additives compartment.
● Close the detergent drawer.
CHAPTER 12

DRYING

DON'T DRY GARMENTS MADE FROM FOAM RUBBER OR FLAMMABLE MATERIALS.

IMPORTANT:
THIS DRYER CAN ONLY BE USED FOR LAUNDRY WHICH HAS BEEN WASHED AND SPIN DRIED.

Warning:
Indications given are general, therefore some practice is needed for the best drying results. We recommend setting a lower drying time than indicated, when first using, so as to establish the degree of dryness required. We recommend not to dry fabrics that fray easily, such as rugs or garments with a deep pile, to avoid air duct clogging.

The water is then conveyed to the drain circuit, which is sealed and therefore, no steam can be released outside.

PROGRAMME SELECTION

Refer to the programme guide to select the most suitable programme.

Turning the selector knob required programme is activate. Wait for the "STOP" indicator light to flash. Then press the START button. When the START button is pressed the machine sets the working sequence in motion.

The programme carries out with the programme selector stationary on the selected programme till cycle ends.

Warning: If there is any break in the power supply while the machine is operating, a special memory stores the selected programme and when the power is restored, it continues where it left off.

At the end of the programme the indicator light "end cycle" will go on.

When the programme has finished
Wait for the door lock to be released (about 1 minute after the programme has finished). Switch off the machine by turning the programme selector to the "OFF" position. Open the door and remove the laundry. Turn OFF the water supply after every use.

FOR ALL TYPES OF WASH CONSULT THE PROGRAMME TABLE AND FOLLOW THE OPERATIONS IN THE ORDER INDICATED.
The correct way to dry:

- Open door.
- Fill with up to 4 kg - in case of large items (e.g. sheets) or very absorbent items (e.g. towels or jeans), it is a good idea to reduce the load.
- Close door.
- Turn programme dial to cotton.
- Select the degree of dryness that you require. This ranges from Extra Dry (💧) for bath towels and bathrobes, through Cupboard Dry (💧) for items that will be put away without ironing, to Iron dry (熨) that leaves the laundry suitable for ironing.

If you wish to select a timed drying cycle, press the “drying programme selection” button until the required time indicator lights up.

DOUBLE-SKIN DOOR
The appliance door is fitted with a protective shield to prevent contact being made with the glass which reaches high temperatures, particularly during the drying cycle.

WARNING: DO NOT TOUCH DOOR FOR ANY REASON WHATSOEVER.

- Make sure water tap is open.
- Make sure water drain is correctly positioned.

Only dry pre-spun laundry

The washer/dryer can perform two types of drying:

Cotton, terry towelling, linen, hemp fabrics, etc...

Advisory note
During drying phase the drum will accelerate to a higher speed to distribute the load and to optimize the drying performance.

Mixed fabrics (synthetics/cotton), synthetic fabrics.

IMPORTANT
NEVER OPEN THE DOOR AFTER THE DRYING CYCLE HAS BEGUN - WAIT UNTIL THE COOL DOWN PERIOD PROVIDED FOR BY THE CYCLE.

4 kg MAX

IMPORTANT
NEVER OPEN THE DOOR AFTER THE DRYING CYCLE HAS BEGUN - WAIT UNTIL THE COOL DOWN PERIOD PROVIDED FOR BY THE CYCLE.
**WARNING:**
DO NOT DRY WOOLLEN GARMENTS OR ARTICLES WITH SPECIAL PADDING, (E.G. QUILTS, QUILTED ANORAKS, ETC.). DELICATE FABRICS IF GARMENTS ARE DRIP/DRY, LOAD LESS ITEMS AS TO PREVENT CREASING.

---

**USEFUL TIPS:**

Do not dry unwashed items in the washer dryer.

Items that have been soiled with substances such as cooking oil, acetone, alcohol, petrol, kerosene, spot removers, turpentine, waxes and wax removers should be washed in hot water with an extra amount of detergent before being dried in the washer dryer.

Items such as foam rubber (latex foam), shower caps, waterproof textiles, rubber backed articles and clothes or pillows fitted with foam rubber pads should not be dried in the washer dryer.

Fabric softeners, or similar products, should be used as specified by the fabric softener instructions.

The final part of a washer dryer cycle occurs without heat (cool down cycle) to ensure that the items are left at a temperature that ensures that the items will not be damaged.

**WARNING:**
Never stop a washer dryer before the end of the drying cycle unless all items are quickly removed and spread out so that the heat is dissipated.

**TABLE OF DRYING TIMES (IN MINUTES):**

<table>
<thead>
<tr>
<th>PROGRAMME</th>
<th>COTTON</th>
<th>MIXED</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Min 1 Kg</td>
<td>Max 4 Kg</td>
</tr>
<tr>
<td>Extra Wardrobe Iron</td>
<td>from 30'</td>
<td>to 230'</td>
</tr>
<tr>
<td></td>
<td>from 30'</td>
<td>to 220'</td>
</tr>
<tr>
<td></td>
<td>from 30'</td>
<td>to 170'</td>
</tr>
</tbody>
</table>

---

● Press the START button.

● The drying phase will begin with the programme dial fixed on the symbol until the end of drying.

● The drying programme indicator will be on until the cool down phase will begin and the indicator ( ) will go on.

● At the end of the programme the indicator light “Stop” will go on.

● Wait for the door lock to be released (about 1 minute after the programme has finished). The “Door Security” indicator light will go out.

● Switch off the machine by turning the programme selector on the “OFF” position.

● Open the door and remove the laundry.

● Turn off the water supply after every use.
CHAPTER 13

AUTOMATIC WASHING/DRYING

WARNING: ONLY A MAXIMUM 4 KG OF DRY LAUNDRY CAN BE LOADED OTHERWISE THE DRIED LAUNDRY WILL BE NOT SATISFACTORY.

Washing:
Open the drawer, choose the detergent and put in the correct amount.

Refer to the list of washing programmes according to fabrics to be washed (e.g. very dirty cotton) and without pressing Start button, prepare wash as described:

Turning the selector knob, the required programme is activated.

Press the option buttons (if required)

Check that the tap is turned on and that the discharge hose is positioned correctly.

Drying:
Select the degree of dryness that you require.
This ranges from Extra Dry ((Configuration) for bath towels and bathrobes, through Cupboard Dry (Configuration) for items that will be put away without ironing, to Iron dry (Configuration) that leaves the laundry suitable for ironing.

If you wish to select a timed drying cycle, press the "drying programme selection" button until the required time indicator lights up.

Press the "Start/Pause" button.

The programme carries out with the programme selector stationary on the selected programme till cycle ends.

The washer-dryer will then complete the entire drying programme.

The drying programme indicator will be on until the cool down phase will begin and the indicator (Configuration) will go on.

At the end of the programme the indicator light "Stop" will go on.

Wait for the door lock to be released (about 1 minute after the programme has finished). The "Door Security" indicator light will go out.

Switch off the machine by turning the programme selector on the "OFF" position.

Open the door and remove the laundry.

Turn off the water supply after every use.

34
CHAPTER 14
CLEANING AND ROUTINE MAINTENANCE

Do not use abrasives, spirits and/or diluents on the exterior of the appliance. It is sufficient to use a damp cloth.

The washing machine requires very little maintenance:

● Cleaning of drawer compartments.

● Removals or long periods when the machine is left standing.

CLEANING OF DRAWER COMPARTMENTS

Although not strictly necessary, it is advisable to clean the detergent, bleach and additives compartments occasionally.

Remove the compartments by pulling gently.

Clean with water.

Put the compartments back into place.

REMOVALS OR LONG PERIODS WHEN THE MACHINE IS LEFT STANDING

When the machine is left standing for long periods in unheated rooms, the drain hose should be emptied of all remaining water.

This operation is recommended when moving the appliance from its installation.

The appliance must be switched off and unplugged. A bowl is needed. Detach the drainage hose from the clamp and lower it over the bowl until all the water is removed.

Repeat the same operation with the water inlet hose.
**CHAPTER 15**

</tr>
<tr>
<td></td>
<td>Transport bracket not removed</td>
<td>Remove transport bracket</td>
</tr>
<tr>
<td></td>
<td>Washing load not evenly distributed</td>
<td>Distribute the washing evenly</td>
</tr>
</tbody>
</table>

**NOTE:**
THE MACHINE IS FITTED WITH A SPECIAL ELECTRONIC DEVICE, WHICH PREVENTS THE SPIN CYCLE SHOULD THE LOAD BE UNBALANCED; THIS REDUCES THE NOISE AND VIBRATION IN THE MACHINE AND SO PROLONGS THE LIFE OF YOUR MACHINE.

Advisory note
During drying phase the drum will accelerate to a higher speed to distribute the load and to optimize the drying performance

If the fault should persist, contact a Technical Assistance Centre. For prompt servicing, give the model of the washing machine, to be found on the label placed on the cabinet inside of the porthole.

**Important**
1. The use of environment friendly detergents without phosphates may produce the following effects:
   - The discharge rinse water may result clouder due to the presence of zeolites in suspension. This does not compromise the efficiency of the rinses.
   - The presence of white powder (zeolites) on the washing at the end of the washing cycle. This does not remain incorporated in the fabric and does not alter the colour.
   - The presence of foam in the last rinse water which is not necessarily a sign of inadequate rinsing.
   - The non-ionic surface-active agents present in the composition of washing machine detergents are often difficult to remove from the washing itself and, even in small quantities, may produce visible signs of the formation of foam.
   - Carrying out further rinses, in cases such as this, is not useful.
2. If your washing machine fails to function, carry out the above-mentioned checks before calling the Technical Assistance Service.

Our Customer Care Centre can be called on:

**0871 22 22 503**

We aim to answer calls as quickly as possible, and in strict rotation as soon as one of our Customer Care team become free.

Our Customer Care Centre opening hours are:
- Monday - Friday 8.00am - 8.00pm
- Saturday 8.30am - 6.00pm
- Sunday 10.00am - 4.00pm

Please ensure that you have available your appliances model number and serial number, there is a space at the back of this book for recording that information.

Alternatively visit the web site as detailed on the front cover of the handbook.

Outside the UK and Northern Ireland, please contact your local supplier.

**CONTACT US**

In case of difficulty within the UK and Northern Ireland, please call Belling Customer Care Centre Helpline on

**0871 22 22 503**

Our Customer Care Centre is open during the hours below:
- Monday to Friday 8am - 8pm
- Saturday 8.30am - 6pm
- Sunday 10am - 4pm

Please have to hand your appliances Model Number and Serial Number, which can be found on the databadge inside you cooker and recorded here for future reference.
