INTRODUCTION

Thank you for buying this high quality appliance from us. We would like to congratulate you on choosing this appliance, and hope you find it to be an attractive and beneficial addition to your home.

This handbook is designed to help you through each step of owning your new appliance, from installation, to use.

Please read through all of this guide carefully before you start using your appliance, as we have endeavoured to answer as many questions as possible, and provide you with as much support as we can.

If, however, you should find something missing, or not covered, please contact the Belling Customer Care team who will be only too happy to assist you on:

0871 22 22 503

In addition you could always try the website for frequently asked questions and more Customer Care information.

Our policy is one of constant development and improvement, therefore we cannot guarantee the strict accuracy of all of our illustrations and specifications - changes may have been made subsequent to publishing.

CUSTOMER CARE INFORMATION

If you should experience problems while operating the appliance please refer to Chapter 13 – Faults search. If the answer to the problem is not covered please call the Customer Care Centre number listed above.

Your appliance is covered by a 12 month manufacturers guarantee. If you experience problems within the first year from the date of purchase a service engineer will be sent to resolve the problem without charge. In order to prove the age of the product please retain your purchase receipt.

CHAPTER 1

GENERAL POINTS ON DELIVERY

On delivery, check that the following are included with the machine:

A) INSTRUCTION MANUAL

B) CAPS

C) BEND FOR OUTLET TUBE

D) LIQUID DETERGENT OR LIQUID BLEACH COMPARTMENT (CONTAINER)

KEEP THEM IN A SAFE PLACE

Check that the machine has not incurred damage during transport. If this is the case, contact your nearest Technical Assistance Centre.

CHAPTER 2

GUARANTEE

The appliance is supplied with a manufacturers 12 month guarantee. Please retain your purchase receipt. This should be kept in a safe place and presented to the engineer if a service call is required.
**CHAPTER 3**

**SAFETY MEASURES**

**IMPORTANT: FOR ALL CLEANING AND MAINTENANCE WORK**

- Remove the plug
- Turn off the water inlet tap.
- All Belling appliances are earthed. Ensure that the main electricity circuit is earthed. Contact a qualified electrician if this is not the case.

**CE** This appliance complies with Directives 89/336/EEC, 73/23/EEC and following changes.

- Do not touch the appliance with wet or damp hands or feet.

**WARNING: DURING THE WASHING CYCLE, THE WATER CAN REACH A TEMPERATURE OF 90°C.**

- Before opening the washing machine door, ensure that there is no water in the drum.

**WARNING: DURING THE WASHING CYCLE, THE WATER CAN REACH A TEMPERATURE OF 90°C.**

- Lift the appliance in pairs as illustrated in the diagram.
- In the case of failure and/or incorrect operation, turn the washing machine off, close the water inlet tap and do not tamper with the appliance. Contact a Technical Assistance Centre for any repairs and ask for original spare parts. Avoidance of these norms may compromise the safety of the appliance.
- Should the supply cord (mains cable) be damaged, this is to be replaced by a specific cable available from the after sales service centre.
MOVING THE MACHINE NEAR ITS PERMANENT POSITION WITHOUT THE PACKAGING BASE

CUT TUBE-HOLDING STRAPS

UNScrew the central screw (A); unscrew the 4 lateral screws (B) and remove the cross piece (C).

UNScrew the two rods D and remove them. Two plastic spacers will fall inside the machine.

LEAN the machine forward, remove the mentioned plastic spacers and remove the plastic bags containing the two polystyrene blocks at the sides, pulling downwards.

STOP the holes using the plugs that you will find inside the bag containing the instruction booklet.

WARNING:
DO NOT LEAVE THE PACKAGING IN THE REACH OF CHILDREN AS IT IS A POTENTIAL SOURCE OF DANGER.
Fix the sheet of corrugated material on the bottom as shown in picture.

Connect the fill hose to the tap.

The appliance must be connected to the water mains using new hose-sets. The old hose-sets should not be reused.

**IMPORTANT:** **DO NOT TURN THE TAP ON AT THIS TIME.**

Position the washing machine next to the wall. Hook the outlet tube to the edge of the sink paying attention that there are no bends or restrictions along the tube.

It is better to connect the discharge hose to a fixed outlet of a diameter greater than that of the outlet tube and at a height of min. 50 cm. If is necessary to use the plastic sleeve supplied.

Please refer to diagrams below for various installation options.

Use the 4 feet to level the machine with the floor.

a) Turn the nut clockwise to release the screw adjuster of the foot.

b) Rotate foot to raise or lower it until it stands firmly on the ground.

c) Lock the foot in position by turning the nut anti-clockwise until it comes up against the bottom of the machine.

Ensure that the knob is on the “OFF” position and the load door is closed.

Insert the plug.

After installation, the appliance must be positioned so that the plug is accessible.
REMOVING THE PLUG:
If your appliance has a non-rewireable moulded plug and you should wish to re-route the mains cable through partitions, units etc., please ensure that either:
- the plug is replaced by a fused 13 ampere re-wireable plug bearing the BSI mark of approval.
or:
- the mains cable is wired directly into a 13 amp cable outlet, controlled by a switch, (in compliance with BS 5733) which is accessible without moving the appliance.

DISPOSING OF THE PLUG:
Ensure that before disposing of the plug itself, you make the pins unusable so that it cannot be accidentally inserted into a socket.

INSTRUCTIONS FOR CONNECTING CABLE TO AN ALTERNATIVE PLUG:
Important: the wires in the mains lead are coloured in accordance with the following code:
- Green & Yellow: Earth
- Blue: Neutral
- Brown: Live

As the colours of the wires in the lead may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:
Connect Green & Yellow wire to terminal marked E or or coloured Green or Green & Yellow. Connect Brown wire to terminal marked L or coloured Red.
Connect Blue wire to terminal marked N or coloured Black.
If a 13 amp plug (BS 1363) is used it must be fitted with a 13 amp fuse either in the plug or adaptor or at the distribution board. If you are in any doubt the electrical supply to your machine, consult a qualified electrician before use.

HOW TO CONNECT AN ALTERNATIVE PLUG:
The wires in this mains lead are coloured in accordance with the following code:
- BLUE: NEUTRAL(N)
- BROWN: LIVE(L)
- GREEN&YELLOW: EARTH(E)

DISPOSING OF THE APPLIANCE:
When disposing of the appliance please remove the plug by cutting the mains cable as close as possible to the plug body and dispose of it as described above.
The option buttons should be selected before pressing the START button.

**INTENSIVE BUTTON**

By pressing this button, which can only be activated in the Cotton cycles, the sensors in the new system come into operation. They affect both the selected temperature, keeping it at a constant level throughout the wash cycle, and the mechanical function of the drum. The drum is made to turn at two different speeds at crucial moments. When the detergent enters the garments, the drum rotates in such a way that the detergent is distributed in a uniform manner; during the wash and rinse procedures, however, the speed increases in order to maximise the cleaning action. Thanks to this special system, the efficiency of the wash procedure is improved WITHOUT ANY INCREASE IN THE LENGTH OF THE PROGRAM.

**SUPER RAPID BUTTON**

By pushing this button the time of the wash programme is reduced to a maximum of 50 minutes depending on the programme and the temperature selected. The super rapid button can be used for washing loads of 1 to 6 kg. (This button can be utilised only on cottons and synthetic programmes).

**EXTRA RINSE BUTTON**

The extra rinse program ensures clothing is thoroughly rinsed and free of detergents. The program combines a unique drum action with a number of additional rinses to achieve a high degree of detergent free clothing.

The extra rinse program is ideal for people with sensitive skin who require minimum detergent residue to avoid irritation or allergies. It is advisable to use this program to clean children’s clothing, towels and heavily soiled items where a lot of detergent has been used and is retained in the fibres.

**Note:** - This program is not suitable for woollen garments and is not available during the wool program.
TIME COUNTDOWN SYSTEM INDICATOR LIGHTS

In order to better manage your time, this washing machine features an indicator light system that keeps you constantly informed on the remaining cycle time.

- **Indicator light START:** Remaining time above 60 minutes
- **Indicator light 60:** Remaining time less than 60 minutes
- **Indicator light 30:** Remaining time less than 30 minutes
- **Indicator light 15:** Remaining time less than 15 minutes
- **Indicator light Stop:** End of the programme.

BUTTONS INDICATOR LIGHT

The indicator light around the option buttons will light when specific options are selected.

PROGRAMME SELECTOR WITH OFF POSITION

ROTATES IN BOTH DIRECTIONS.

The machine is turned on by selecting a programme via the programme selector. This status will be indicated by the stop indicator light flashing. This light will continue to flash until the machine has started or the machine is returned to the off position.

Press the “Start/Pause” button to start the selected cycle.

The programme carries out with the programme selector stationary on the selected programme till cycle ends. Switch off the washing machine by turning the selector to OFF.

NOTE:

- The programme selector must be return to the off position at the end of each cycle or when starting a subsequent wash cycle prior to the next programme being selected and started.

Please read these notes

When washing heavily soiled laundry it is recommended the load is reduced to 3 kg maximum.

** Programmes according to CENELEC EN 60456.

The spin speed may also be reduced, to match any guidelines suggested on the fabric label, or for very delicate fabrics cancel the spin completely this option is available with a spin speed control.

The variable temperature selector allows a reduction in the wash temperature. For example, an intense cottons cycle can be washed in cold water simply by moving the dial to the [ⅠⅠⅠ] symbol.

When only a limited number of articles have stains which require treatment with liquid bleaching agents, preliminary removal of stain can be carried out in the washing machine.

Pour the bleach into the liquid bleach container, inserted into the compartment marked "Ⅰ" in the detergent drawer, and set the special programme "RINSE" [ⅠⅠ]. When this phase has terminated, turn the programme selector to the "OFF" position, add the rest of the fabrics and proceed with a normal wash on the most suitable programme.

** Programmes according to CENELEC EN 60456.

The spin speed may also be reduced, to match any guidelines suggested on the fabric label, or for very delicate fabrics cancel the spin completely this option is available with a spin speed control.

When this phase has terminated, turn the programme selector to the "OFF" position, add the rest of the fabrics and proceed with a normal wash on the most suitable programme.
**CHAPTER 8**

**SELECTION**

For the various types of fabrics and various degrees of dirt the washing machine has 4 different programme bands according to wash cycle, temperature and length of cycle (see table of washing cycle programmes).

1 **RESISTANTS FABRICS**
The programmes have been designed for a maximum wash and the rinses, with spin intervals, ensure perfect rinsing. The final spin gives more efficient removal of water.

2 **MIXED AND SYNTHETIC FABRICS**
The main wash and the rinse gives best results thanks to the rotation rhythms of the drum and to the water levels. A gentle spin will mean that the fabrics become less creased.

3 **SPECIAL DELICATE FIBRES**
This is a new wash cycle which alternates washing and soaking and is particularly recommended for very delicate fabrics such as Pure Machine Washable Wool. The wash cycle and rinses are carried out with high water levels to ensure best results.

SPECIAL "HAND WASH"
This washing machine also has a gentle Hand Wash programme cycle. This programme allows a complete washing cycle for garments specified as "Hand Wash only" on the fabric care label. The programme has a temperature of 30°C and concludes with 3 rinses and a slow spin.

4. **SPECIALS**

SPECIAL "RINSE" PROGRAMME
This programme carries out three rinses with an intermediate spin (which can be reduced or excluded by using the correct knob). It can be used for rinsing any type of fabric, eg. use after hand-washing.

SPECIAL "SPIN" PROGRAMME
Programme "SPIN" carries out a maximum spin (which can be reduced by using the correct knob).

**DRAIN ONLY**
This programme drains out the water.

---

**“ALL 40°C” PROGRAMME**
This is an exclusive system and involves 2 great advantages for the consumer:

- to be able to wash together different type of fabrics (e.g., cotton + synthetic etc…) **NON-FAST COLOURED**
- to wash with a considerable energy saving.

The “ALL 40°C” is an eco friendly programme that has low energy consumption (850W/h). The programme achieves this by using a low water temperature combined with periods of inactive soaking and short periods of drum cycling over a period of three hours.

Important:
- the first washing of new coloured fabrics must be done separately;
- in every case, never mix **NON-FAST COLOURED** fabrics.

**30 MINUTE RAPID PROGRAMME**
The 30 minute rapid programme allows a complete washing cycle to be carried out in approximately 30 minutes, with up to a maximum load of 2 kg and a temperature of 40°C. When selecting the “30 minute rapid” programme, please note that we recommend you use only 20% of the recommended quantities shown on the detergent pack.
CHAPTER 10

THE PRODUCT

IMPORTANT:
When washing heavy rugs, bed spreads and other heavy articles, it is advisable not to spin.

To be machine-washed, woollen garments and other articles in wool must bear the “Machine Washable Label”.

IMPORTANT:
When sorting articles ensure that:
- there are no metal objects in the washing (e.g. brooches, safety pins, pins, coins etc.),
- cushion covers are buttoned, zips and hooks are closed, loose belts and long tapes on dressing gowns are knotted,
- runners from curtains are removed,
- attention is paid to garment labels.
- when sorting, any tough stains should be removed prior to washing using stain removers only recommended on label.

NOTE: SOME DETERGENTS ARE DIFFICULT TO REMOVE. FOR THESE, WE RECOMMEND YOU USE THE SPECIAL DISPENSER WHICH IS PLACED IN THE DRUM.

NOTE: ONLY PUT LIQUID PRODUCTS IN THE COMPARTMENT LABELLED “✿✿”. THE MACHINE IS PROGRAMMED TO AUTOMATICALLY TAKE UP ADDITIVES DURING THE FINAL RINSE STAGE FOR ALL WASH CYCLES.
CHAPTER 11

CUSTOMER AWARENESS

A guide environmentally friendly and economic use of your appliance.

MAXIMISE THE LOAD SIZE

Achieve the best use of energy, water, detergent and time by using the recommended maximum load size. Save up to 50% energy by washing a full load instead of 2 half loads.

DO YOU NEED TO PRE-WASH?

For heavily soiled laundry only! SAVE detergent, time, water and between 5 to 15% energy consumption by NOT selecting Prewash for slight to normally soiled laundry.

IS A HOT WASH REQUIRED?

Pretreat stains with stain remover or soak dried in stains in water before washing to reduce the necessity of a hot wash programme. Save up to 50% energy by using a 60°C wash programme.

WASHING

VARIABLE CAPACITY

This washing machine automatically adapts the level of the water to the type and quantity of washing. In this way it is also possible to obtain a “personalized” wash from an energy saving point of view. This system gives a decrease in energy consumption and a sensible reduction in washing times.

EXAMPLE:

A net bag should be used for particularly delicate fabrics.

Let us suppose that the washing consists of HEAVILY SOILED COTTON (tough stains should be removed with suitable stain removal).

It is advisable not to wash a load made up entirely of articles in towelling fabric which absorb a lot of water and become too heavy.

● Open the detergent drawer (P).

● Put 120 g in the main wash compartment marked II.

● Put 50 ml of the desired additive in the additives compartment.

● Close the detergent drawer (P).
CHAPTER 12

CLEANING AND ROUTINE MAINTENANCE

Do not use abrasives, spirits and/or diluents on the exterior of the appliance. It is sufficient to use a damp cloth.

The washing machine requires very little maintenance:

- Cleaning of drawer compartments.
- Removals or long periods when the machine is left standing.

CLEANING OF DRAWER COMPARTMENTS

Although not strictly necessary, it is advisable to clean the detergent, bleach and additives compartments occasionally.

Remove the compartments by pulling gently.

Clean with water.

Put the compartments back into place.

FOR ALL TYPES OF WASH CONSULT THE PROGRAMME TABLE AND FOLLOW THE OPERATIONS IN THE ORDER INDICATED.
CHAPTER 13

REMOVALS OR LONG PERIODS WHEN THE MACHINE IS LEFT STANDING

When the machine is left standing for long periods in unheated rooms, the drain hose should be emptied of all remaining water.

This operation is recommended when moving the appliance from its installation.

The appliance must be switched off and unplugged. A bowl is needed. Detach the drainage hose from the clamp and lower it over the bowl until all the water is removed.

Repeat the same operation with the water inlet hose.

If the fault should persist, contact a Technical Assistance Centre. For prompt servicing, give the model of the washing machine, to be found on the label placed on the cabinet inside of the porthole.

Important
1 The use of environment friendly detergents without phosphates may produce the following effects:
   - The discharge rinse water may result cloudier due to the presence of zeolites in suspension. This does not compromise the efficiency of the rinses.
   - The presence of white powder (zeolites) on the washing at the end of the washing cycle. This does not remain incorporated in the fabric and does not alter the colour.
   - The presence of foam in the last rinse water which is not necessarily a sign of inadequate rinsing.
   - The non-ionic surface-active agents present in the composition of washing machine detergents are often difficult to remove from the washing itself and, even in small quantities, may produce visible signs of the formation of foam.
   - Carrying out further rinses, in cases such as this, is not useful.
2 If your washing machine fails to function, carry out the above-mentioned checks before calling the Technical Assistance Service.
Our Customer Care Centre can be called on:

**0871 22 22 503**

We aim to answer calls as quickly as possible, and in strict rotation as soon as one of our Customer Care team becomes free.

Our Customer Care Centre opening hours are:
- Monday - Friday 8.00am - 8.00pm
- Saturday 8.30am - 6.00pm
- Sunday 10.00am - 4.00pm

Please ensure that you have available your appliance's model number and serial number; there is a space at the back of this book for recording that information.

Alternatively visit the web site as detailed on the front cover of the handbook.

Outside the UK and Northern Ireland, please contact your local supplier.

**CONTACT US**

In case of difficulty within the UK and Northern Ireland, please call Belling Customer Care Centre Helpline on

**0871 22 22 503**

Our Customer Care Centre is open during the hours below:
- Monday to Friday 8am - 8pm
- Saturday 8.30am - 6pm
- Sunday 10am - 4pm

Please have to hand your appliance's Model Number and Serial Number, which can be found on the databadge inside your cooker and recorded here for future reference.
